- CSS, HTML, JavaScript, C#, PHP, Java, SQL, SASS, XML
-

Software

- ASP.NET, jQuery, AngularJS, Git, IIS, Apache, WordPress, Kentico, Umbraco, Drupal, Android, iOS, Exact Target, Google Analytics
-

Experience

2012 - 2016

Web Application Developer, [thunder::tech](#)

- Starting with a design file I was able to handle all phases of a typical web development process. I started with responsive front-end development, then CMS integration and custom web application development, through the launch and post-launch support of 50+ websites.
- Additional daily duties included scoping, quoting, software development planning, account management, client training, server configuration, and QA testing.
- Contributed to creation and guidance of procedures as our team more than tripled in size.

2011 - 2012

Web Developer Intern, [thunder::tech](#)

2009 - 2010

Production Services Intern, [GXS](#)

- Mainframe system administrator performing maintenance on a Electronic Data Interchange system.

2009

Help Desk Associate, [FedEx](#)

- Handled technical troubleshooting calls for company employees.

2006 - 2008

IT Intern, [Parker Hannifin](#)

- Managed a large Microsoft Windows network.
-

Education

2012

B.S, Computer Science & Philosophy Minor from [John Carroll University](#)
